

FSU Secure Setup Instructions for an Android Mobile Device - Student

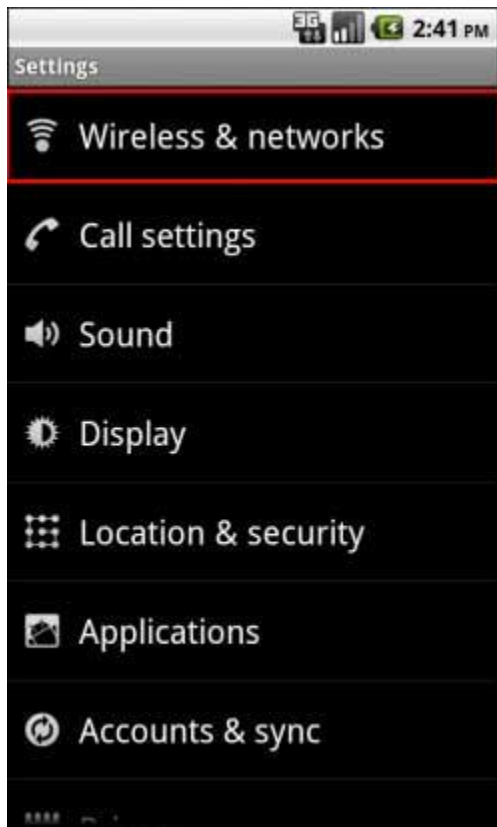

Version: Froyo 2.2

Taken from the Droid X

1. Click to view **All Apps**, Select **Settings**

2. Click **Wireless & networks**

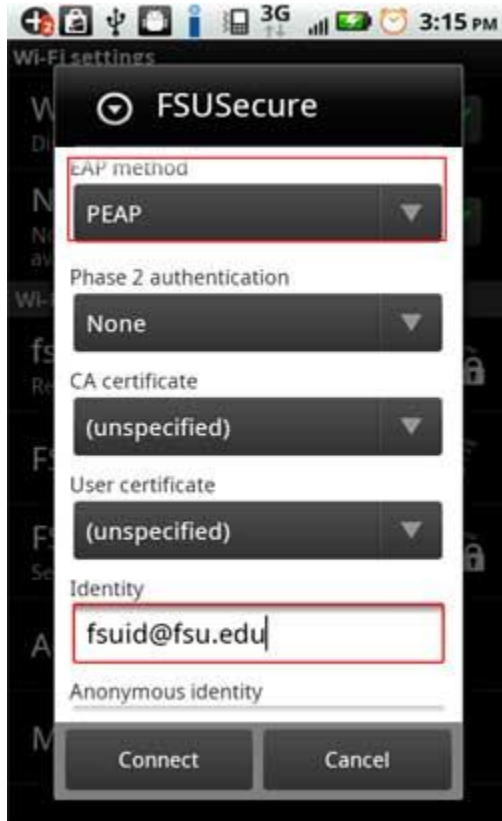

3. Make sure the device's Wi-Fi is enabled (*step 1 in image below*).Next click **Wi-Fi settings** (*step 2 in image below*)

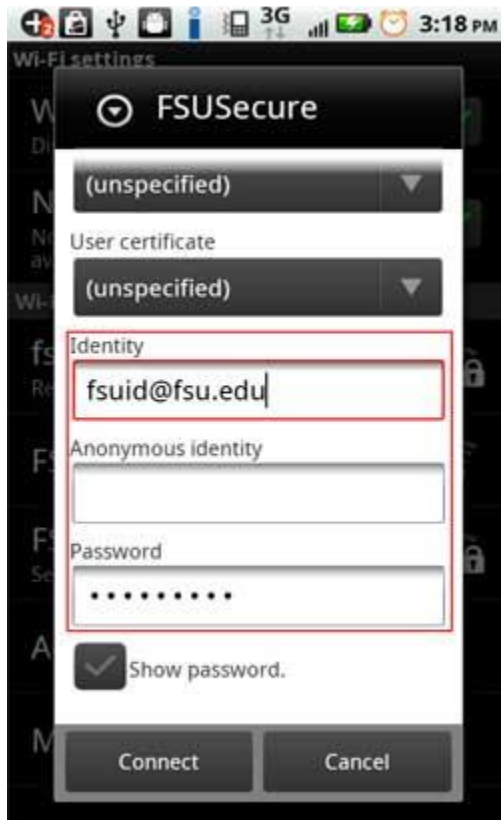

4. If you are within range of the **FSUSecure** wireless network, it should show on your screen as in the picture below. Select **FSUSecure**.

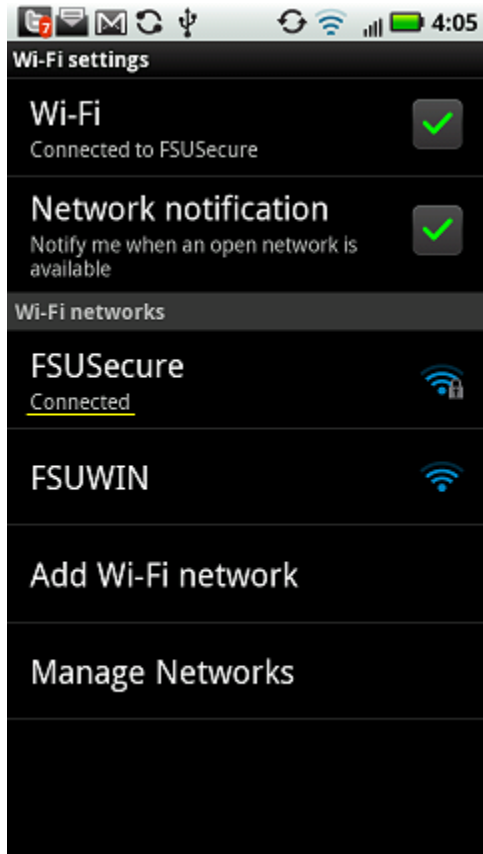

5. Next select **PEAP** from the EAP method dropdown menu

6. In the identity field -if you're a student- enter your official FSU Email address (FSUID@fsu.edu) or as a member of the Faculty/Staff, enter your FSUID. Next insert your password and Password fields.

7. Click **Connect**

8. The next screen should pop up showing you are now connected to the **FSUSecure wireless network**

Setup is now complete.
