

Return to Campus Tech Checklist

As many of us transition back to the office for work, there are a few things to keep in mind. Complete the checklist below to make sure your technology is ready to support you when you return.

☐ **Install Computer Updates**

Return to campus, connect to an FSU network, sign in to your FSU-issued computer, allow updates to run and restart your computer as needed.

TIP: Updates could take several hours, so consider returning to campus ahead of time or on a less busy day to install updates.

☐ **Connect to FSU Wi-Fi**

If you have trouble connecting to Wi-Fi, “forget” the FSU network on your device and reconnect to FSU Secure with your FSU password.

How to Update Devices with New Password: fla.st/TRA9LKL5

☐ **Reset Voicemail Password**

Catch up on messages and follow the prompts to reset your voicemail password.

TEMPORARY PASSWORD: 6245

How to Set Voicemail Password: fla.st/RJJPO2M4

☐ **Visit the Flex Tech Webpage**

If you plan to work from an alternate location all or part of the time in the future, reference the ITS Flex Tech webpage for technology recommendations and resources.
